Problem Solving Answer the question below.

Problem: Each of the identically painted cubes has one face of each color: yellow, orange, red, green, blue, and purple. How must the net be colored to create another identical cube?

Understand

4 cubes are painted the same way. I need to draw a net that would create an identically painted cube.

Plan

Strategy: Draw a picture or diagram; Guess and check.
Use a net of the cube and fill in the corresponding colors.

Solve

B shares edges with G, R, Y and a fourth color.
Therefore, B is opposite O or P.
Two of eight possible solutions are shown.
